Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

Nicely written.

The authors should add more information about the operation - preparation of the patient, premedication, level of understanding, cooperation as well as about the conduct of general anaesthesia - gas or i.v. induction, airway management in the setting of predicted difficult airway - tracheal intubation or laryngeal mask airway? A sentence or two should be as well written about pain intensity prior to the procedure and postoperatively.

Level of interest: An article whose findings are important to those with closely related research interests
Quality of written English: Acceptable
