Comments to authors:

Please introduce the present concepts in the text, as there are additional information your should vive, some aspects important in the discussion and some important articles which should be cited:

In our case..(please describe whether you suspected other endometriosis nodules during surgery and whether you performed any biopsies for endometriosis staging. Do you have any intraoperative images of the case? If not did you perform any additional postoperative exams after surgery?)

4. Vaginal examination should be performed in all patients with suspected endometriosis (Dunselman GA, Vermeulen N, Becker C, Calhaz-Jorge C,

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable
