Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The presented case report is very interesting and should be strictly considered for future clinical practice both in oncology and ophthalmology. For those reasons i guess it deserves the publication. The work needs many language corrections before being published.

Quality of written English: Needs some language corrections before being published
