Reviewer’s report

Title: Iatrogenic Hypervitaminosis D as an Unusual Cause of Persistent Vomiting: A Case Report

Version: 2  Date: 9 August 2013

Reviewer: Indra Ramasamy

Which of the following best describes what type of case report this is?: An unexpected association between diseases or symptoms

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Interesting case report. Value lies in the association between toxicity level of vitamin D and clinical presentation

Quality of written English: Needs some language corrections before being published
