To the Editors,
Journal of Medical Case Reports

Subject:
Submission of Cover Letter for “Case Report & Literature Review” titled,
"Cytomegalovirus-associated splenic infarcts in an adult immune-competent male patient. A case report and review of the literature”
Protopapa MN, Velissaris D, Mougiou A, Siagris D

Dear Sir/Madam

We are submitting a Case Report titled, “Cytomegalovirus-associated splenic infarcts in an adult immune-competent male patient. A case report and review of the literature.”

Protopapa MN, Velissaris D, Mougiou A, Siagris D for consideration for publication in Journal of Medical Case Reports.

I, Dr. Maria Nikoletta Protopapa certify that:

• The manuscript is being submitted by me (Corresponding author) on behalf of all the authors.
• Written, informed consent was taken from the patient for reporting this case.
• The manuscript is original work of all authors.
• All authors made a significant contribution to this study.
• This manuscript has not been submitted for publication; it has not been accepted for publication and has not been published in any other journal.
• All authors have read and approved the final version of the manuscript.
• This manuscript is not the first report of this kind in the literature but all authors believe it significantly advances our understanding of this particular disease etiopathology.
• It is an original case report of interest to either Internal Medicine or other areas of medical interest with broader clinical impact.

Thank you

Sincerely,
Dr. Maria Nikoletta Protopapa

Comments/Point-by-Point response to Editorial Team concerns

1. The Editor’s comments’ link (PDF format) has not been downloaded for reading due to opening problems. Referees’ comment files have been downloaded.
2. The comments have been addressed in a revised manuscript provided. All changes have been highlighted in yellow during manuscript’s revision.
3. The ethnicity of the patient has been stated in the Case Presentation section.
4. A list of the abbreviations used in the manuscript and their meanings has been included after the Conclusions section.
5. Figures had already been uploaded separately via the online submission system and the same action will take place when resending the revised manuscript.
6. We were asked initially to upload eventual tables separately and in this revision tables in the main manuscript are included after the References List as asked.
7. Assistance of a fluent English speaking colleague has been sought in order to improve the quality of written English before the manuscript can be considered further.
8. Co-authors e-mail addresses had been sent via the cover letter and in this revision they will be added in the title page as well.
9. As per Reviewer No1 no particular changes were needed.
10. As per Reviewer No2 changes have been made accordingly referring to:
    10a) the expression “obvious trigger”
    10b) the addition of a possible explanation of Protein S reduction
    10c) the citation numbers that have been re-written as per Referee’s advice to be in ascending order and revise the correspondence of citation numbers and reference
    10d) the term “Antithrombin III” has been substituted by the term “Antithrombin”
    10e) the term “hetero-nil- antibody mononucleosis” has been substituted by the term “with detected mononucleosis-like antibodies”
