Reviewer's report

Title: Multidisciplinary approach in an unusual presentation of locally advanced gastric cancer. A case report.

Version: 5 Date: 11 November 2014

Reviewer: Theodossis S. Papavramidis

Which of the following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

The authors really intrigues me by their very kind reply. So, it would be nice to mention in the text the values of the intra abdominal pressures measured during patients hospitalization.

Moreover, the fact that the patient had no apparent increase of IAP does not mean that a paragraph in the discussion concerning this issue will not increase the scientific value of the manuscript.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
