Reviewer's report

Title: New Jersey Center for Tourette Syndrome Sharing Repository: Methods and Sample Description

Version: 3 Date: 11 November 2008

Reviewer: Andrew Pakstis

Reviewer's report:

Re-Review 11-November-2008

The authors of this report have done a satisfactory job of revising their manuscript in response to the comments of the reviewers. I have no new revisions to suggest.

The TS repository described in this report is a useful resource that will grow more useful overtime—as more individuals are added and as researchers make use of it and build upon it. It is a little early to tell whether the repository will become a “model” to be imitated by advocacy groups interested in advancing researchers on other common disorders, but there is a substantial audience of researchers who will find this report worth reading.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

Re-iteration:
I declare that I have no competing interests.
