Reviewer's report

Title: Gene expression profiling supports the hypothesis that human ovarian surface epithelia are multipotent and capable of serving as ovarian cancer initiating cells

Version: 2 Date: 30 October 2009

Reviewer: Philippe Van Trappen

Reviewer's report:

The authors have now appropriately addressed all issues raised in previous review.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
