Reviewer's report

Title: Lineage relationship of prostate cancer cell types based on gene expression

Version: 4 Date: 2 May 2011

Reviewer: Samuel Denmeade

Reviewer's report:

The authors have responded to my original comments. They have modified the Methods to better clarify the cell lines. They have also responded to my query on the larger implications and importance of the work. They have included additional supplementary tables as I requested.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
