Reviewer’s report

**Title:** Genomic profiling of rectal adenoma and carcinoma by array-based comparative genomic hybridization

**Version:** 3  **Date:** 11 September 2012

**Reviewer:** Manny Bacolod

**Reviewer’s report:**

A. Major Compulsory Revisions

1. Upon evaluation of the revised manuscript, I think the authors were able to address the major concerns of this reviewer. I’m sure they could have done better on discussing the differences between rectal and colon tumors (as far as chromosomal aberrations are concerned). Nonetheless, the current revised version will suffice for publication.

B. Minor Essential Revisions

1. There are just few, and very minor errors. For instance: a) using “Then” in the beginning of a sentence (Abstract), b) using “maybe” instead of “may be” (bottom of page 11).

C. Discretionary Revisions

None

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
