Reviewer's report

Title: Biological network inferences for protection mechanism against familial Creutzfeldt-Jakob disease with E200K pathogenic mutation

Version: 5 Date: 12 June 2014

Reviewer: João Oliveira

Reviewer's report:

Dear Editor,
This is a very interesting report, using a powerful approach to highlight promising new genetic variants, however, the writing is precarious. The authors should request a MAJOR review by a native speaker.
The whole article should be revised again before a new submission is sent.

Level of interest: An article of importance in its field

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests: I declare that I have no competing interests
