Reviewer's report

Title: Effect of foot orthoses on lower extremity kinetics during running: a systematic literature review.

Version: 2 Date: 8 October 2008

Reviewer: Christopher MacLean

Reviewer's report:

Minor Essential Revisions

1) Clearly define customised foot orthoses is. This nomenclature has different meanings in different regions and should be clarified.

2) Consider changing rearfoot pronation to eversion.

3) Please add resultant in front of joint moment and always clarify whether you are presenting internal or external resultant joint moments.

4) Under Rearfoot Inversion Moment (3rd pgh) Correction: reference 56 included only healthy subjects. Consider adding (MacLean et al. (2008), Clinical Journal of Sports Medicine 2008; 18: 338-343) where both healthy subjects and subjects with a Hx of injury were investigated.

5) Consider changing Normal to Healthy, throughout.

Well done.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
