Reviewer's report

Title: A geometric analysis of hallux valgus: correlation with clinical assessment of severity

Version: 2 Date: 30 April 2009

Reviewer: Mark Gilheany

Reviewer's report:

General Comment
The authors have made substantive revisions and addressed the concerns raised in relation to the first draft.
The result is a far more accessible and relevant piece of work.

Minor Essential Revisions
I would suggest that a final review by the authors is conducted to address minor grammatical issues and also consider an edit to make the text more economical (reduce word count).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
I declare that I have no competing interests.
