Reviewer’s report

Title: The association between foot-care self efficacy beliefs and actual foot-care behaviour in people with peripheral neuropathy- a cross sectional study

Version: 2 Date: 12 December 2008

Reviewer: Katarina Hjelm

Reviewer’s report:

Excuse me for being late with the re-review of the paper but I did actually tidy up my desk and it disappeared from the important pile and then there came a lot in between! However, I just have some comments:

Firstly, in the abstract it could be more simply expressed that this was a questionnaire study in which participants filled in a foot care confidence scale toghether with the principal investigator.

Secondly, the conclusion in abstract and paper is not in agreement which need to be changed.

Then, it is ok for publication.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
