Reviewer's report

Title: Idiopathic toe walking and Sensory Processing Dysfunction: A review of the literature.

Version: 1 Date: 20 June 2010

Reviewer: Angela Margaret Evans

Reviewer's report:

Thank you for the repeated opportunity to review this interesting review. It is greatly improved now and I am happy for it to be proceeded after the following:

1. Minor Essential Revisions
   - p6: para 1 (midway down): please use gender inclusive language ie "...a child to develop their motor skills..."
   - Table 2: please add a column for the texts (and cross-refer on page 7, last line; page 8, end 2nd para)
   - p 7: please add dates for databases 4-7 as possible

2. Discretionary Revisions
   - Suggest Table 1 conditions be arranged alphabetically
   - suggest having a re-read for language clarity and simplify as can (I have made this discretionary as I am aware of individual styles , but do encourage consistency with "ITW" vs "toe-walking", as the latter may not be idiopathic..

Thank you for the work and effort that has gone into this review. It is a valuable clarification and may direct future studies into this common and at times baffling clinical condition.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
