Reviewer's report

Title: Development of a practical guide for the early recognition for malignant melanoma of the foot and nail unit for podiatrists.

Version: 1 Date: 24 August 2010

Reviewer: Adam Sheridan

Reviewer's report:

An excellent study directed at developing a practical instrument to facilitate the early diagnosis and optimised care of this very significant, but often overlooked condition. It is to be hoped that a prospective clinical study analysing the results of it's application 'in the field' is to follow.

Level of interest: An article of importance in its field
