Reviewer’s report

Title: Diagnostic accuracy of existing methods for identifying diabetic foot ulcers

Version: 1 Date: 9 November 2010

Reviewer: Michelle Claire Spruce

Reviewer’s report:

Minor Essential Revisions

I would be beneficial to provide greater detail with respect to the Kappa weighting as the data at present would not allow replication or scrutiny of the analysis. Moreover, the reference currently used with respect to this area is dated 1968 and a more up to date one would be more appropriate.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
