Reviewer's report

Title: Screening for foot problems in children - is this practise justifiable?

Version: 2 Date: 13 June 2012

Reviewer: Cyylie Williams

Reviewer's report:

Thank you again for the opportunity to review this article.

I appreciate the effort and changes the author has made in order to address the suggested revisions.

As the article currently stands, it is has improved readability and changed flow allows the reader to better understand and follow the process of WHO screening necessity and how podiatry screening fits/does not fit into this model.

My only comment would be in regarding clarification of additional information in references 5, 9-11 and 45 and if this is appropriate for publication.

I have no hesitation recommending this for publication and again thank the author for addressing this current topic.
