Reviewer's report

Title: Investigation of the Biomechanical Effect of Variable Stiffness Shoe on External Knee Adduction Moment in Various Dynamic Exercises

Version: 2 Date: 2 July 2013

Reviewer: Peter R Worsley

Reviewer's report:

Minor Essential Revisions:
1. Although you have acknowledged limitations of motion capture and inverse dynamics in the comments these have not been reflected in the discussion. Please add.
2. Literature review is now two and a half pages long, suggest trying to condense.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
