Reviewer's report

**Title:** The Bangla clubfoot tool: a repeatability study.

**Version:** 3  
**Date:** 21 March 2014

**Reviewer:** Kelly Gray

**Reviewer's report:**

Minor essential revisions
Methods - First line - largely is spelt incorrectly
Methods - line 5 - 'an' should be replaced with 'a' visiting WFO volunteer

Background - 7th line - the sentence 'there are also recognised factors that are peculiar to this cultural context and clinical setting'. I would suggest expanding on the cultural contexts and clinical settings so that a relevance to this paper is established. This may be as simple as adding examples to the sentence.

Results
Line 10 - constant is spelt incorrectly

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
