Reviewer's report

Title: Calcium phosphate-hybridized tendon graft to enhance tendon-bone healing two years after ACL reconstruction in goats

Version: 2 Date: 21 June 2011

Reviewer number: 2

Reviewer's report:

I am afraid that the re-written parts in the text (i.e.: p.6, p.14,----) are poorer in English expression. I think it better for the parts to be proof-read again. Then, the manuscript will be ready for publication.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
