Reviewer's report

Title: The treatment of medial tibial stress syndrome in athletes; a randomized clinical trial

Version: 1 Date: 2 September 2011

Reviewer number: 1

Reviewer's report:

The study investigated functional outcome of three common treatment options for medial tibial stress syndrome (MTSS in non-military) athletes.

The question posed by the authors is important. Other parts of the paper are well developed.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
