Reviewer’s report

Title: Incidence and pattern of injuries among adolescent basketball players in Nigeria

Version: 3 Date: 24 February 2012

Reviewer number: 2

Reviewer’s report:

1. Preferably, the statement on level of significance under data analysis should read thus. ‘The level of significance was chosen or taken at P=0.05’ or ‘a statistical test result is taken as significance if P<0.05

2. The first four lines in the ‘discussion’ was unnecessary repetition of lines 12-15

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
