Reviewer's report

Title: A double patella-like condition secondary to synovial osteochondromatosis.

Version: 1 Date: 22 September 2011

Reviewer number: 1

Reviewer's report:

This paper is interesting as a clinically-rare case report regarding a double patella-like condition secondary to synovial osteochondromatosis in the knee. A reviewer also agrees to Authors' conclusions in the text of the paper. Moreover, scientific contents based on diagnostic imagings, arthroscopic findings and histopathological findings, are sufficient for publication in this Journal.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
