Reviewer's report

Title: Clinical Descriptive Measures of Shoulder Range of Motion for a Healthy, Young and Physically Active Cohort

Version: 1 Date: 10 November 2011

Reviewer number: 3

Reviewer's report:

I respect that the author and his group examined ROM of glenohumeral joint of over 600 healthy population. However, the results they reported did not include new information and would not inspire readers to read and learn this paper.

I am sorry to say that it would be very hard to accept this paper even with major revisions.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
