Reviewer's report

Title: Birt-Hogg-Dube Syndrome Presenting as Multiple Oncocytic Parotid Tumors

Version: 2 Date: 25 May 2012

Reviewer: Jacek Gronwald

Reviewer's report:

The authors present a case of woman referred for genetic evaluation due to bilateral parotid gland tumors, who was subsequently diagnosed with Birt-Hogg-Dube syndrome, what according to my knowledge was not described before. BHD syndrome is an uncommon genodermatosis characterized by the triad of fibrofolliculomas, trichodiscomas, and acrochordons of the skin. The case described is well characterized and the paper well written.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable
