Reviewer's report

Title: The role of Wnt signaling pathway in carcinogenesis and implications for anticancer therapeutics

Version: 1 Date: 15 July 2013

Reviewer: Katarzyna Tutlewska

Reviewer's report:

Minor Essential Revisions
There is a complete absence of figures or diagrams. In my opinion in such topics, where authors touch up the subject of signalling pathway of proteins, it would be attractive to show some illustrations.

There is also a spelling mistake e.g. signaling instead of signalling.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
