Reviewer's report

Title: Australian Clinicians And Chemoprevention For Women At High Familial Risk For Breast Cancer

Version: 1 Date: 17 February 2009

Reviewer: Steven Narod

Reviewer's report:

Excellent paper, nice summary of important situation. Nice to have Australian perspective on this. Pleasant to read. Minor comments only

Major compulsory revisions
none

Minor essential revisions
say in abstract we are referring to tamoxifen and raloxifene. Might discuss tamoxifen versus ralixifene in discussion. Did intro of raloxifene change things for clinicians?

In abstract need to say who where clinicians.

In methods need to describe the clinicians in greater detail with regard to specialisation etc. This is a highly selected group, no?

Dont abbreviate ‘BC’ for breast cancer

Discretionary revisions
None

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
