Reviewer’s report

Title: Drug therapy for hereditary cancers

Version: 1 Date: 20 July 2011

Reviewer: Rodney J. Scott

Reviewer’s report:

The last paragraph of page 8 requires some attention as the authors have not described any details about the patient’s disease. I presume it is pancreatic cancer but am not certain.

The authors should describe the potential value of aspirin in HNPCC.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
