Reviewer's report

Title: Mobile phone text messaging for promoting adherence to anti-tuberculosis treatment: a systematic review protocol

Version: 5 Date: 6 December 2012

Reviewer: Babalwa B Zani

Reviewer's report:

The authors have addressed all my previous comments. They only need to change the search date from November 2012 to be the most recent. It would also be beneficial (not compulsory) to add a date on how far back will they search. The study design is appropriate to test the hypothesis, and sufficient details have been provided to allow replication or comparison of the work.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
