Reviewer's report

Title: An overview of conducting systematic reviews with network meta-analysis

Reviewer's report:

1. At the end of the first paragraph of the section "The need for network meta-analysis in comparative effectiveness research" after "[20]" she may want to add something like "and likely problematic to interpret". A couple of lines prior I'm not sure whether the "teo" and "three" should be "2" and "3".

2. On the last paragraph "as a final remark", could become "Finally".
