Reviewer’s report

Title: Smart wearable body sensors for patient self-assessment and monitoring: a systematic review

Version: 1 Date: 9 March 2014

Reviewer: Jean-Louis Vincent

Reviewer’s report:

The authors reviewed the literature on smart wearable body sensors. The review is quite complete and interesting- the paper is well written.

Major comments
1-the paper indicated this is a systematic review, but the authors fail to indicate how they ensured the review was indeed systematic.
2-the paper would benefit from an illustration (maybe a Table)
3-it seems to me that in the glucose monitoring section a word about the contact lens glucose sensor would be welcome.

Minor comment:
The level of precision is too high in Page 10 (decimals).

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
