Reviewer's report

Title: An open prospective study of amikacin pharmacokinetics in critically ill patients during treatment with continuous venovenous haemodiafiltration.

Version: 5 Date: 4 October 2012

Reviewer: Mariann Churchwell

Reviewer's report:

The authors have provided a much better manuscript and I could follow the easily follow the process for the most part. I only had one point that was a bit confusing on page 9 which was the description of parameter A and B although I believe I understood what the author was stating it may be beneficial to provide a clearer definition to the reader.

The write-up provided on each patient was very helpful in understanding potential approaches to dosing this drug.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
