Reviewer’s report

Title: Active Post-Marketing Surveillance of the Intralesional Administration of Human Recombinant Epidermal Growth Factor in Diabetic Foot Ulcers

Version: 1 Date: 27 June 2013

Reviewer: Carlo Maria Ferdinando F Caravaggi

Reviewer’s report:

I think that no further informations are needed to accept the paper for publication considering that the study can be considered only an Active Post-Marketing Surveillance”.

As far as the quality of the study from statistical and clinical point of view many concerns could be raised regarding protocol treatment, patients selection and quality of results but these questions are out of the objective of the present study.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
