Reviewer's report

Title: Frequency of positive states of mind as a moderator of the effects of stress on psychological functioning and perceived health

Version: 6 Date: 11 July 2013

Reviewer: Shannon Wiltsey Stirman

Reviewer's report:

This revised manuscript appears to have addressed the reviewers' comments. The author also appropriately notes the limitations associated with the study.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
