Reviewer's report

Title: Tear of Peroneus longus in long distance runners due to enlarged Peroneal tubercle.

Version: 1 Date: 15 June 2012

Reviewer number: 2

Reviewer's report:

1) Major Compulsory Revisions
None

2) Minor Essential Revisions
On line 38 of page 3, change “Ultrasound” into “Ultrasound (US)”.
On line 55 of page 3, change “CT” into “computerized tomography (CT)”.
On line 81 of page 4, change “Ultrasound (US)” into “US”.
Legends need more detailed explanation.
MRI or US images of peroneal tendon tear is needed.

3) Discretionary Revisions
Because two cases were senior or elder athletes, the relationship between aging and vulnerability of the tendon had better be described in discussion.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published
