Reviewer's report

Title: Notch signaling activation is critical to the development of neuropathic pain

Version: 3  
Date: 10 December 2014

Reviewer: Dae-Hyun Roh

Reviewer's report:

The manuscript was appropriately revised based on the comments. I have only two comments, which need to be corrected.

Comments:
1. In figure 3, the marks of experimental groups should be changed.
2. As figure 3 and 4 in the previous original manuscript, the dose-dependent effect of DAPT and Jagged-1 should be presented and discussed.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
