Reviewer's report

Title: Notch signaling activation is critical to the development of neuropathic pain

Version: 3  Date: 8 December 2014

Reviewer: Gabriel Rusanescu

Reviewer's report:

The authors have addressed my questions, although some of my comments were incorporated directly into the paper, without further discussion. For example the impact on nociception of both excitatory and inhibitory neurons being affected by Notch signaling could have been addressed. However the paper can be published as it is.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
