Reviewer’s report

Title: Effects of propofol versus thiopental on Apgar scores in newborns and peri-operative outcomes of women undergoing emergency caesarean section: a randomized clinical trial

Version: 2 Date: 25 November 2014

Reviewer: Charles Algert

Reviewer’s report:

Discretionary revisions:

The authors have added the median and interquartile values for decision to delivery times to the Results, as suggested. It would be better if these were also presented in Table 1 as median and IQR, rather than the mean and standard deviation. However, this decision can be left to the author.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
