Reviewer’s report

Title: Perioperative management of paraganglioma and catecholamine-induced cardiomyopathy in child- a case report and review of the literature

Version: 0 Date: 14 Jul 2017

Reviewer: Thomas M. Austin

Reviewer's report:

This case report deals with a pediatric patient that underwent surgical resection of a catecholamine-secreting paraganglioma. Although the authors were quite thorough on various pathophysiological and perioperative aspects of this disease and synthesized the literature well, this manuscript does not present any new and/or unexpected findings in this patient population. Previous case reports have tackled this topic (1-3).

References:

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
