Reviewer’s report

Title: Hemodynamic effects of lateral tilt before and after spinal anesthesia during cesarean delivery: an observational study.

Version: 2 Date: 20 Nov 2017

Reviewer: Ramon Abola

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

Thank you for submitting this revision. I am satisfied that each of the concerns raised in my earlier review have been addressed. I applaud the author's for their work. Their study provides valuable information about the value of LLT after spinal anesthesia in c/section patients. Thank you for sending this manuscript for me to review.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
Please indicate the quality of language in the manuscript:
