Reviewer's report:

Dear Editors

Many thanks for your invitation to review mentioned manuscript. You can find my opinion regarding it as followings:

1- When I review a paper, after reading the paper I always ask myself the "so what?" question. So what did I learn from the paper? So what is new? So what, will it change my practice? This is still somehow missing in the discussion. The authors should be answered to mentioned question in the discussion.

2- Author must also explain how calculate sample size of study in the methodology.

3- Evaluation methodology is almost incomplete and unclear.

4- Insert and discuss data from the paper:

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
