Reviewer’s report

Title: The influence of different patient positions during rapid induction with severe regurgitation on the volume of aspirate and time to intubation. A prospective randomised manikin simulation study

Version: 1 Date: 28 Dec 2018

Reviewer: Morgan Le Guen

Reviewer's report:

The authors are to be congratulated on a well thought out study on a controversial topic.

I have only a few minor comments.

I would add the word manikin to the title, such as a randomized manikin simulation study.
Page 6, lines 155 to 167. I would omit the scenario.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
