Reviewer's report

Title: The Clarus Video System (Trachway) and Direct Laryngoscope for Endotracheal Intubation with Cricoid Pressure in Simulated Rapid Sequence Induction Intubation: A Prospective Randomized Controlled Trial

Version: 1 Date: 08 Jan 2019

Reviewer: Johann Knotzer

Reviewer's report:

I have no further suggestions. The manuscript was re-written according to the suggestions to change the primary goal of this study in primary success rate and intubation time between groups. The manuscript improved as a whole. I have just one comment in the abstract of the revised manuscript. Please re-write the sentence "Primary outcome were to assess the effect of CP....." as this was the former goal of this study. In my opinion this manuscript is suitable for publication.

Hans Knotzer

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
