Reviewer’s report

Title: Relative cerebral hyperperfusion during cardiopulmonary bypass is associated with risk for postoperative delirium: a cross-sectional cohort study

Version: 1 Date: 14 Jan 2019

Reviewer: Raffaele Aspide

Reviewer's report:

Thanks to the authors for their work of implementation of the paper.

I think some of my observations are very close to those made by other reviewers.

I am satisfied with the integration work done, now the paper is more precise and legible.

So no others raccomandations.

I only recommend you only if the authors confirm that it is a prospective observational study with a cross-sectional study, it will be precious to use STROBE checklist as platform.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
