Reviewer’s report

Title: A novel approach to neuraxial anesthesia: application of an automated ultrasound spinal landmark identification

Version: 0  Date: 03 Dec 2018

Reviewer: Berrin Günaydin

Reviewer's report:

This is a very well designed and well-written paper. However, I kindly suggest authors to shorten the introduction part since it is too long. My suggestion is either to omit the whole 1st page or to use the 1st page content in the discussion part accordingly if possible.

Additionally, I kindly suggest authors to rename table 1 as 'demographics and success rates of the technique'.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
