Reviewer's report

Title: Validity of Mini-Fluid Challenge for Predicting Fluid Responsiveness Following Liver Transplantation

Version: 1 Date: 26 Feb 2019

Reviewer: Marina Moguilevitch

Reviewer's report:

I consider multiple changes made by the authors according to the suggestions proposed by the reviews acceptable. The quality of the article improved significantly. Answers provided by the authors are satisfactory. Article has certain limitations but can open a new prospective on the colloids boluses challenges in optimizing volume status of the liver transplant recipients.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
