Reviewer’s report

Title: Intubation of non-difficult airways using video laryngoscope versus direct laryngoscope: a randomized, parallel-group study

Version: 0 Date: 17 Dec 2018

Reviewer: Hassan Ahmed

Reviewer's report:

I read with interest this well written and designed article, the authors addressed some defects in the literature regarding the difference in the complications incidence between Intubation using glidescope versus direct laryngoscope.

The authors should clarify the intubation time in each group.

Otherwise, this article might be suitable for publication.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
