Reviewer’s report

Title: Intra-operative red blood cell transfusion and mortality after cardiac surgery

Version: 0 Date: 06 Jan 2019

Reviewer: Patrick Meybohm

Reviewer's report:

I really much appreciate to review this fascinating manuscript. The topic is very important, study design and analyses are adequate, the presentation of study results and discussion are impressive.

I recommend to accept this paper with the following minor modification:

Please add the data for allogeneic transfusions of plasma, platelets, coagulation factors, and number/rate of patients with massive bleeding/massive transfusion.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
