1) The article in order to be eligible for publication requires necessarily major improvement in the quality of the written English. There are several sentences that result not comprehensible.

2) I suggest you to read carefully the notes of all the reviewers and to address each single point and not try to "paste" the suggestions in the article because this final result makes the article confusing and not readable.

3) Also, as I previously mentioned, after writing the the full form of one acronym the first time it appears in the text, later you must use the abbreviations.
